Event Overview

Please join us at the Canadian Orthopaedic Association Meeting to hear from world renowned surgeons Dr. Brent Lanting, Dr. Mark Clatworthy, and Dr. John Wright as they discuss the future of robotics and digital. They will discuss how and why robotics is beneficial in a public healthcare system and how the latest technology is addressing some key needs, concerns & factors in knee arthroplasty.

Faculty

Mark Clatworthy, MD

Mercy Ascot Hospital

Auckland, NZ

Brent Lanting, MD

London Health Sciences Centre

London, ON

Chief Medical Officer

DePuy Synthes

This webinar reflects the techniques, approaches and opinions of the individual presenter. This DePuy Synthes sponsored presentation is not intended to be used as a training guide. The steps demonstrated with respect to the use of any medical device in this webinar may not be the complete steps of the procedure. Individual physician preference and experience, as well as patient needs, may dictate variation in procedure steps. Before using any medical device including those demonstrated or referenced in this webinar, review all relevant package inserts with particular attention to the indications, contraindications, warnings and precautions, and steps for use of the device. Health Care Professionals are responsible for complying with the requirements of their respective hospital/entity, regulatory bodies and licensing authorities.
