

ACUTE PAIN PATHWAYS

Exploring Evolving Practices and New Drug Therapies in Canada

SPEAKER:

Hance Clarke MD, FRCPC, PhD

- Staff anesthesiologist and the Director of Pain Services and the Pain Research Unit at the Toronto General Hospital.
- President of the Canadian Pain Society and the Canadian Consortium for the Investigation of Cannabinoids.

OBJECTIVES:

At the end of this session, participants will be able to:

- Analyze the current goals and evidence-based approaches for managing acute pain in Canada.
- Examine the impact of acute pain on patients and identify key unmet needs in current care practices.
- Explore current and emerging treatment strategies and research in the field of acute pain management.
